

ID	Story	Estimated Hours	Priority (1-5)
1.1	Create base flutter app	2	5
1.2	Design and setup database using firestore	4	5
1.3	CRUD functionality from database into app	10	4
1.4	Create basic UI design	4	5
1.5	Page for basic data visualizations (new words/day, ect.)	10	4
1.6	Basic authentication using firebase authenticator	15	4
1.7	Page to add words to a child	10	4
1.8	Create spell check functionality	2	1
1.9	Add home page to app	3	2
2.1	Connect authentication to database	5	5
2.10	Setup Google Cloud Storage	2	4
2.11	Refactor word model to handle multiple languages	3	2
2.12	Add settings page	1	3
2.13	Allow parent to pick language to track	3	2
2.14	Add switch language setting	10	4
2.15	Allow video upload/stroage	10	5
2.16	Page for video streaming	3	4
2.17	Researcher home page	12	4
2.18	Add feature to add new children and switch between children	5	5
2.19	Add feature to add existing child to new parent	5	5
2.2	Custom Claims for User Roles (and firebase functions)	5	4
2.20	Multilingual Funtionality for Spellcheck	5	3
2.3	Optimize Existing Stats Page Queries	1	2
2.4	Catch and Handle errors in firebase_repository	2	4
2.5	Update authentication system to use user id instead of email	3	4
2.6	Add More Statistics to Stats Page	1	1
2.7	Update user model class to resyncchronize if another synch	2	3
2.9	Add roles to authService	2	4
3.1	add download as csv function to researcher	2	4
3.2	Video Streaming	10	5
3.3	video selection and upload for specified user	10	5
3.4	anonymize database	3	4
3.5	Update User model class to use a listener	6	4
3.6	Refactor top bar to work with new user model class	4	4
3.7	anonymized database	5	4
3.8	Add email-uid table download button	3	5
3.9	Cleanup admin page	1	3
3.10	Refactor landing page UI	6	3
3.11	Add surveys at signup	4	3
3.12	Add researcher account from admin	3	4
3.13	Add accept terms and conditions page	4	3
4.1	Research for word parsing AI	15	1
4.2	automate token Refresh Using FCM	10	2
4.3	Put app on Google Play Store	7	3
4.4	Implement word parsing AI	20	1

4.5	E2EE	7	1
4.6	Update repository to throw errors instead of just catching the	6	5
4.7	Add generic exception catch and function rerun function	3	5
4.9	add override to add words (for names ect.)	5	2
4.10	force parent to create child on sign up	5	4
4.11	allow parents to annotate videos - ie put video and words tog	12	4
4.12	Fix overflow error in admin_ page on phones	2	3
4.13	admin page	2	2
4.14	Add a button to make a user a researcher in the admin page	2	5
4.15	Alert Child list with FCM when a user creates a new child	8	1
